Guidance for TB Notification in India

The screenshot shows the RNTCP website in Internet Explorer. The browser address bar displays <http://nikshay.gov.in/User/Default.aspx>. The page header features the Government of India emblem and the text "REVISED NATIONAL TUBERCULOSIS CONTROL PROGRAMME (MINISTRY OF HEALTH AND FAMILY WELFARE, GOVERNMENT OF INDIA)". Navigation tabs include HOME, FAQs, and CONTACT US. A "Welcome" message is followed by a "User Management" menu with options: User Management, Master Management, TB Notification, Search/Query, Reports, and Sign Out. An "About RNTCP" section contains text about TB in India, stating that two deaths occur every three minutes from tuberculosis. It describes TB as a disease caused by a bacterium, Mycobacterium tuberculosis, and notes that India has a long tradition of research in TB. It mentions that modern anti-TB treatment can cure virtually all patients, but treatment must be taken for a minimum of 6 months. The text concludes that the DOTS strategy ensures that infectious TB patients are diagnosed and treated effectively till cure, by ensuring availability of the full course of drugs and a system for monitoring patient

1	Background:	<p>Tuberculosis is a major public health problem in India. Early diagnosis and complete treatment of TB is the cornerstone of TB prevention and control strategy. India's National TB Control programme provides quality assured diagnostic and treatment services to all the TB patients including necessary supportive mechanisms for ensuring treatment adherence and completion. The country has a huge private sector and it is growing at enormous pace. Private sector predominates in health care and TB treatment. Extremely large quantities of anti-TB drugs are sold in the private sector. Non standardized prescribing practices among some of the private providers with inappropriate and inadequate regimens and unsupervised treatment continues without supporting patient for ensuring treatment adherence and completion with unrestricted access to first and second line TB drugs including without prescription. This frequently leads to treatment interruptions and subsequent drug resistance.</p> <p>Revised National TB Control Programme provides mechanisms to ensure treatment adherence support including Directly Observed Therapy (DOT). But a large number of patients are not benefitted with these programme services and leads to non adherence, incomplete, inadequate treatment leading to M/XDR TB, mitigating all the efforts of the programme to prevent emergence and spread of drug resistance. If the TB patients diagnosed and treated under all sectors are reported to public health authorities, the mechanisms available under the programme can be extended to these patients to ensure treatment adherence and completion. The impending epidemic of M/XDR TB can only be prevented to a large extent by this intervention.</p> <p>In order to ensure proper TB diagnosis and case management, reduce TB transmission and address the problems of emergence of spread of Drug Resistant-TB, it is essential to have complete information of all TB cases. Therefore, Govt of India declared Tuberculosis a notifiable disease on 7th May 2012. All public and private health providers shall notify TB cases diagnosed and/or treated by them to the nodal officers for TB notification.</p> <p>This guidance document aims to to minimize variations in notification practice and improve the quality of data in the local TB surveillance system.</p>
---	--------------------	---

2	Why should private health facilities notify TB?	<p>Notification gives an opportunity to support private sector for following standardized practices in terms of Standard TB Care. It helps the patients to get right diagnosis, treatment, Follow up, Contact Tracing Chemoprophylaxis & facilitates social support systems.</p> <p>Complete and accurate data obtained from notification will allow continuous evaluation of the trend of the disease with better estimation of burden/impact.</p>
3	Objectives:	<ol style="list-style-type: none"> 1. To establish Tuberculosis surveillance system in the country 2. To ensure proper TB diagnosis and case management and further accelerate reduction of TB transmission 3. To extend mechanisms of TB treatment adherence and contact tracing to patients treated by all health care providers 4. To mitigate the impending Drug resistant TB epidemic in the country
4	Minimum information requirement for TB notification:	<ol style="list-style-type: none"> 1. TB Case name 2. Age 3. Sex 4. GoI-issued personal unique identification number (Aadhaar, Driving license etc) 5. Detailed address of TB case with pin code 6. Phone number 7. Basis of diagnosis: Microbiologically-confirmed TB case / Clinical TB case 8. Patient category: New / Recurrent TB case / Treatment change 9. Site of disease: Pulmonary / Extra-pulmonary only 10. Rifampicin resistance: Resistant / sensitive / not available (& other drug resistance pattern by laboratories)
5	Definitions for TB notification	<p>Basis of diagnosis:</p> <ol style="list-style-type: none"> 1. <u>Microbiologically-confirmed TB case</u> – Patient diagnosed with at least one sputum specimen positive for acid fast bacilli, or Culture-positive for Mycobacterium tuberculosis, or RNTCP-approved Rapid Diagnostic molecular test positive for tuberculosis <p style="text-align: center;">OR</p> <ol style="list-style-type: none"> 2. <u>Clinical TB case</u> – Patient diagnosed clinically as tuberculosis, without microbiologic confirmation and

		<p>initiated on anti-TB drugs.</p> <p>Patient type:</p> <p><u>New TB case</u> – Patient who has never been treated with anti-TB drugs or has been treated with anti-TB drugs for less than one month from any source</p> <p><u>Recurrent TB case</u> – Patient who has been treated for tuberculosis in the past and been declared successfully treated (cured/treatment completed) at the end of their treatment regimen.</p> <p><u>Treatment change</u> – Patient returning after interruption, or patients put on a new treatment regimen and due to failure of the current treatment regimen.</p> <p>Site of disease</p> <p><u>Pulmonary TB case</u> – Patient with TB of the lungs (with or without involvement of any extra-pulmonary locations).</p> <p><u>Extra-pulmonary TB case</u> – Patient with TB of any organ other than the lungs, such as pleura, lymph nodes, intestines, genitourinary tract, skin, bones and joints, meninges of the brain, etc, diagnosed with microbiological, histological, radiological, or strong clinical evidence.</p> <p>Rifampicin resistance:</p> <p><u>Rifampicin resistant</u> – Patient with a drug susceptibility test result from a RNTCP-certified laboratory or WRD (WHO-endorsed Rapid Diagnostics) drug susceptibility test report showing resistance to rifampicin.</p> <p><u>Rifampicin sensitive</u> – Patient with a drug susceptibility test result from a RNTCP-certified laboratory or WRD drug susceptibility test report showing sensitivity to rifampicin.</p> <p><u>Not available</u> – Patient without a drug susceptibility test result from a RNTCP-certified laboratory or WRD drug susceptibility test report.</p>
6	<p>List of RNTCP endorsed TB diagnostics</p>	<p>Smear Microscopy (for AFB):</p> <ul style="list-style-type: none"> – Sputum smear stained with Zeil-Nelson Staining or – Fluorescence stains and examined under direct or indirect microscopy with or without LED. <p>Culture:</p> <ul style="list-style-type: none"> – Solid(Lowenstein Jansen) media or

		<ul style="list-style-type: none"> – Liquid media (Middle Brook) using manual, semi-automatic or automatic machines e.g. Bactec , MGIT etc. <p>Rapid diagnostic molecular test:</p> <ul style="list-style-type: none"> – Conventional PCR based Line Probe Assay for MTB complex or – Real-time PCR based Nucleic Acid Amplification Test (NAAT) for MTB complex e.g. GeneXpert <p>[Sputum Smear Microscopy (for AFB): Sputum smear stained with Zeil-Nelson Staining or Fluorescence stains and examined under direct or indirect microscopy. Sputum Culture: Sputum culture on solid (Lowenstein Jansen) media or liquid media (Middle Brook) using manual, semi-automatic or automatic machines e.g. Bactec , MGIT etc.</p> <p>Rapid diagnostic molecular test: Line Probe Assay for MTB or Nucleic Acid Amplification Test (CB-NAAT) Note: Diagnosis of TB based on radiology (e.g. X-ray) will be termed as clinical TB]</p>
7	<p>Registration of the Health establishments for TB notification</p>	<p>For operational simplicity, the types of Health establishments will be divided into three categories</p> <ol style="list-style-type: none"> 1. Laboratories 2. Private practitioner / Clinic (single) 3. Hospital / Clinic / Nursing Home (multi) <p>Laboratories will include those Health Establishments carrying out any of the RNTCP endorsed TB diagnostics</p> <p>Private practitioner / Clinic (single) will include any Health Establishments where TB cases are treated or diagnosed clinically / radiologically and the medical services are provided by single medical practitioner</p> <p>Hospital / Clinic / Nursing Home (multi-practitioners) will include any Health Establishments where TB cases are treated or diagnosed clinically / radiologically & medical services are provided by more than one practitioner</p> <p>Each of the Health Establishment will be registered for TB Notification by submitting a simple registration form mentioning the details of the establishment. This registration form can be availed from the nodal officer for TB Notification in the district or can be downloaded from http://tbcindia.nic.in.</p>

		<p>Alternatively health Establishments can be automatically registered by the respective nodal officers after submission of their first TB notification report to respective nodal officer in the district.</p> <p>Each Health Establishment on receipt of request for registration for TB Notification or submission of first TB notification report will receive the Unique number for further correspondence after verification / confirmation of the submitted details.</p>
8	<p>Mechanisms for TB notification</p>	<p>Route of information transmission:</p> <ol style="list-style-type: none"> 1. Submission of hard copy of the TB to the Nodal Officer for TB notification <ul style="list-style-type: none"> ○ by post ○ by courier ○ by hand 2. Submission of the soft copy to the Nodal Officer for TB Notification by authorized Email 3. Submission of information to the Nodal Officer for TB Notification using authorized mobile <ul style="list-style-type: none"> ○ by Mobile phone call * ○ by IVRS (Interactive Voice Response System) * ○ by SMS * <p>(*will be incorporated in future)</p> 4. Uploading of information directly on the Nikshay portal http://nikshay.gov.in(this website is under construction & such facility may be available from 2013 after the health establishments are registered) This, in future, may include direct online TB cases information transmission from newer diagnostic machines like CB-NAAT or MGIT etc. 5. In States/UTs or districts where the bilateral understanding is established between the Health Establishments and the local public health authorities for convenient local TB notification, the information on TB Notification can be submitted to the local public health authorities (e.g. Medical Officer of the Primary Health Center) as designated by the district nodal authority for TB notification. However, this should be done only in consultation with the concerned district nodal officer for TB notification. <p>Note: The list of Nodal Officers is available on http://tbcindia.nic.in/.</p>

		<p>In case, health care provider is not aware about the contact details of the nodal officer for TB Notification in the district the same may be obtained from the respective District TB Officer / State TB Officer for the updated contact.</p> <p>In case of any grievances, the same may be sent to tbnotification@tbcindia.nic.in & issues regarding electronic reporting data update may be sent to helpdesk.nikshay@tbcindia.nic.in mentioning the name and complete address of the health care facility.</p> <p>Health establishments and medical practitioners not routinely diagnosing / treating TB patients may give an undertaking regarding the same while agreeing to submit the information in future, in case they diagnose or treat any TB case.</p>
9	Responsibility of the district level nodal officer	<ul style="list-style-type: none"> • Disseminate information regarding TB Notification to all Health Establishments in the district and the professional bodies like IMA • Provide the formats for TB Notification and Health establishment registration form for TB Notification to all Health Establishments in the districts • Ensure that each Health Establishment submitting registration form or submitting its first TB Notification report (whichever is earlier) are visited / their details are confirmed within two weeks from submission • Ensure that all Health Establishments in the districts are registered for TB Notification by Dec 2012 and they are given the Unique ID • Maintain the list of Health Establishments with details and IDs • Ensure that all Health Establishments in the district notify TB cases on timely manner • Capacity building of the local Medical Officers and health staff to undertake public health action for the TB cases notified • Ensure that all TB cases notified by all the Health establishments are entered in the Nikshay portal not later than two weeks from submission of the report • Routinely review the progress in TB notification by all Health Establishments in the district
10	Responsibility of the Local public health authority	<ul style="list-style-type: none"> • Carry out following activities as directed by and in consultation with the district nodal officer for TB Notification <ul style="list-style-type: none"> ○ Disseminate information regarding TB Notification to all Health Establishments in the district and the

		<p>professional bodies like IMA</p> <ul style="list-style-type: none"> ○ Provide the formats for TB Notification and Health establishment registration form for TB Notification to all Health Establishments in the districts ○ Ensure that each Health Establishment submitting registration form or submitting its first TB Notification report (whichever is earlier) are visited / their details are confirmed within two weeks from submission ○ Ensure that all Health Establishments in the districts are registered for TB Notification by Dec 2012 and they are given the Unique ID ○ Ensure that all Health Establishments in the district notify TB cases on timely manner ○ Capacity building of the health staff to undertake public health action for the TB cases notified ○ Collect, collate and upward submit the TB Notification reports submitted by the Health Establishments
11	Responsibility of the health worker	<ul style="list-style-type: none"> ● Regularly visit all Health establishments in the area of work and promote understanding and requirement about the TB Notification amongst the staff and medical practitioners in the Health Establishments ● Provide the formats for TB Notification and Health establishment registration form for TB Notification to all Health Establishments in the districts ● Collect, collate and upward submit the TB Notification reports submitted by the Health Establishments ● Ensure that all TB cases notified by the Health establishments are entered in Nikshay ● Visit the TB patients notified by the Health Establishments in consultation with them for important and timely public health actions including: <ul style="list-style-type: none"> ○ Counselling of TB patients including promotion of treatment adherence & Follow up to ensure treatment completion ○ TB Contact tracing, screening for symptoms and referral for evaluation if any TB symptomatic is found amongst the TB contacts ○ Offering INH chemoprophylaxis as per RNTCP policy ○ Family members counselling ○ Offering TB treatment under RNTCP, if desired by the patients ○ Advising on ICTC services, further testing of C&DST, if eligible

Annexure II**Declaration of not diagnosing / treating TB cases**

To,

Nodal Officer for TB Notification,

..... District

..... State

Dear Sir,

I had received the information regarding notification of Tuberculosis patients. I understand that I am expected to report each and every patient who has been either diagnosed as Tuberculosis or prescribed treatment with anti-tuberculosis drugs or both needs to be reported on at least monthly basis to health system. I have also received the format.

My details are as follows:

1. Name:
2. Qualification:
3. Registration / Licence no.
4. Correspondence address:
5. Contact: Landline (with STD): Mobile:
Email (if any):
6. I had neither diagnosed nor prescribed anti-tb drugs / treatment or both in last one year and I usually do not manage TB patients. Hence I request to kindly grant exemption from submitting monthly report. I take full responsibility that I will report even if I manage (diagnose / prescribe tb drugs / both) a single patient during any month. If I fail to report such case, I will be responsible for the further action.
7. I had been informed that District TB Officer / health system staff will be making enquiry to the pharmacy shops / community as a surprise check and proposal for actions will be initiated if it is found that the TB patient managed by me / my institute/ health facility / lab / diagnostic centre has not been reported from my side.

TB Notification reporting format for Laboratory

Period of reporting: From/...../..... To/...../.....

Name of the Laboratory :.....

Registration Number:..... Telephone (with STD):.....

Mobile number:.....

Complete Address:

Health Establishment code for TB Notification

...../.....

Sr No	Name of TB Patient (surname first)	Father / Husband's name	Age (yrs)	Sex (M/F/O)	Govt issued identification number *	Complete residential address	PIN number	Patient Phone number	Date of TB Diagnosis	Date of sputum collection	Date of result	Type of Test result (smear positive / culture positive / molecular test – LPA Xpert / DST	DST results for each drug tested (R=resistant / S=sensitive/NA=not available) Rif, INH, SM, EMB, Ofx, Km, Eto, Cipro, Capr, etc \$							
													Rif	INH	SM	EMB	Ofx	Km	—	—

* Aadhaar, driving license, voter ID, ration card, PAN no, passport no etc

Laboratories include those Health Establishments carrying out any of the RNTCP endorsed TB diagnostics

Signature:..... Date:/...../.....

TB Notification reporting format for medical practitioners / Clinics/Hospitals/Nursing homes

Period of reporting: From/...../..... To/...../.....

Name of the health facility / practitioner :.....(single/Multi)

Registration Number:..... Telephone (with STD):.....

Mobile number:.....

Complete Address:

Health Establishment code for TB Notification

...../.....

Sr No	Name of TB Patient (surname first)	Father / Husband's name	Age (yrs)	Sex (M/F/O)	Gol issued identification number *	Complete residential address	PIN number	Patient Phone number	Date of TB Diagnosis	Date of TB treatment initiation	Site of Disease (P / EP)	Pateint Type (New TB case/ Recurrent TB case/ Treatment change)	Basis of diagnosis (Sputum microscopy / culture / PCR / LPA/ Clinical exam/X-Ray)	Treatment started (No / First line / second line)

* Aadhaar, driving license, voter ID, ration card, PAN no, passport no etc

Private practitioner / Clinic (single) will include any Health Establishments where TB cases are treated or diagnosed clinically / radiologically and the medical services are provided by single medical practitioner

Hospital / Clinic / Nursing Home (multi-practitioners) will include any Health Establishments where TB cases are treated or diagnosed clinically / radiologically & medical services are provided by more than one practitioner

Signature:..... Date:/...../.....
